

MUBASHAR ALI

Full Stack Web Developer — React.js · Next.js · Node.js · MongoDB

Lahore, Pakistan (Open to On-site & Hybrid) · +92 324 5233273 · mubasharali.web@gmail.com · github.com/mubasharali557 · portfolio-pxv7.vercel.app · linkedin.com/in/mubashar-ali-747056362/

PROFESSIONAL SUMMARY

Full Stack (MERN) developer with 1+ year of hands-on delivery, including an 8-month on-site internship at Heapware Software House, Arfa Tower, Lahore. Shipped 9+ production web applications across e-commerce, healthcare and retail, including 5 client projects and 4+ independent applications. Experienced in building responsive React.js/Next.js interfaces, secure REST APIs with Node.js/Express/MongoDB, JWT authentication, Cloudinary uploads, SEO and production deployment on Vercel and Render. Available immediately for on-site or hybrid roles in Lahore.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive design, reusable component architecture

Backend: Node.js, Express.js, REST API design, JWT authentication, Multer file uploads

Database: MongoDB (Mongoose), MySQL, schema design & data modelling

Tools: Git & GitHub, Vercel, Render, Cloudinary, Postman, npm

Other: On-page & technical SEO, performance optimisation, client requirement gathering

WORK EXPERIENCE

Web Developer (Intern) — Heapware Software House · Arfa Tower, Lahore

8 months · On-site

- Delivered 5 client projects end to end — requirement gathering, UI development, API integration and deployment — with zero missed handover deadlines.
- Built responsive React.js and Next.js interfaces with Tailwind CSS, converting client mockups into reusable component sets used across multiple projects.
- Integrated REST APIs using Node.js, Express and MongoDB for authentication, product, cart and order flows, including JWT-protected routes and Cloudinary image uploads.
- Improved page performance through route-level code splitting, lazy loading and image optimisation, while working directly with clients through review cycles to final delivery.

Full Stack Web Developer — Freelance & Independent Projects · Lahore

2024 – Present

- Architected, built and deployed 4+ full-stack applications independently using React.js/Next.js, Node.js, Express and MongoDB.
- Designed REST APIs with JWT authentication, input validation and structured error handling for reliable client-server communication.
- Maintain a reusable React component library to reduce setup time on new projects and apply on-page/technical SEO including semantic markup, metadata and image optimisation.

FEATURED PROJECTS

EmaanMall — E-commerce platform

Product listings with search, cart management and secure checkout over REST APIs, plus admin product management with image uploads.

J. Jamshad Store — Fashion retail e-commerce

Custom storefront with product browsing, cart and order flow for direct-to-customer online sales; content optimised for on-page SEO.

Medmate — Healthcare platform

Responsive, accessible React.js interface providing patients with medical information and services.

HS Electric Store — Electronics e-commerce

Mobile-first storefront with category browsing, cart and order flow.

AI Image Generator — AI web app

Prompt-based image generation with a responsive gallery interface optimised for fast load and smooth interaction across mobile and desktop.

Project Stack: React.js, Next.js, Node.js, Express.js, MongoDB, Tailwind CSS
